Luc Brun

PhD candidate · AI agent safety & alignment

Lyon, France · lucphilippe.brun@gmail.com

github.com/Luckyluuuc · linkedin.com/in/luc-brun

I work on the safety and alignment of LLM agents navigating software environments. My background connects research on language models with hands-on experience prototyping multi-agent systems and deploying AI in industry.

EXPERIENCE

PhD candidate · AI agent safety
Centrale Lyon / Infologic — Oct 2026 – present

Research on the safety and alignment of agents acting in software environments, connected to LIRIS and the IMAGINE team.

AI engineer
Infologic — Sep 2025 – present

Designed and deployed AI-based integration of natural-language orders into an ERP. Contributed to AI strategy, team development, internal training and onboarding.

LLM & multi-agent safety · Internship
Orange — Feb – Aug 2025

Scientific literature review, proofs of concept and agent experiments. Contributed to a working group evaluating agent frameworks for generative AI.

LLM compression · Research internship
ERIC Laboratory · ANR DIKE — Sep 2023 – Jan 2024

Quantization experiments, model evaluation and metrics. Co-authored a paper accepted in Findings of NAACL 2024.

EDUCATION

Polytech Lyon · Engineering degree in computer science, AI focus · 2020–2025

University of Ljubljana · Erasmus exchange, Computer and Information Science · Sep 2024 – Feb 2025

Research & selected work

PUBLICATION

When Quantization Affects Confidence of Large Language Models?

Irina Proskurina, Luc Brun, Guillaume Metzler & Julien Velcin · Findings of NAACL 2024

Study of the influence of quantization on the calibration and confidence of BLOOM, OPT, LLaMA and Mistral models.

Paper / Publication ↗ · ANR DIKE ↗

PROJECTS

Multi-agent LLM experimentation

Supervisor and swarm architectures with LangGraph: tool use, memory and coordination between specialized agents.

github.com/Luckyluuuc/multi-agent-langgraph-xp

GPT-like Transformer · Python / PyTorch

Educational implementation following Andrej Karpathy's course: bigrams, multi-head attention, character- and word-level text generation.

github.com/Luckyluuuc/GPTmodel

SKILLS

Research: AI safety & alignment, responsible AI, LLMs, NLP, multi-agent systems, neural networks, quantization.

Python · PyTorch · LangGraph · LangChain · MCP · Hugging Face · NumPy · Pandas · Jupyter · GCP · Git · SQL · Java · C++

Teamwork · Scientific curiosity · Project management · Technical communication

SELECTED CERTIFICATIONS

AI Safety Fundamentals: Alignment · BlueDot Impact · 2024

Machine Learning Specialization · Stanford Online · 2023

Natural Language Processing Specialization · DeepLearning.AI · 2023

COMMUNITY & LANGUAGES

Digital Services (H)acked · Brussels, 2024: RAG experiments on Jean Zay. Bridging the Gap · Hasso Plattner Institute, 2024: "Neutral Network", among ten finalist teams.
